'DESK LOCK' (KEY-OPERATED DEAD-BOLT)

Designed originally for wooden furniture, this is a key-operated 'deadbolt' lock (does not slam). It is a simple and inexpensive unit which can be used for any small cabinet or drawer.

Finish: chromium-plated.

Square-section bolt is thrown as key is turned through 180°. Key withdraws in both positions.

Insert from rear so that housing protrudes through round hole (20 mm dia). Secure through fixing holes in rear flange. Striker plate available.

'FS' keys only, non-shuttered.

'PUSH-BUTTON 'CUBBY' LOCK WITH SLAM-BOLT

This is a popular and well-proven 'cubby' lock, which slams shut and is opened by push-button action. Its small size and simple method of fixing makes it suitable for inspection windows, control boxes, etc.

Lock slams against panel edge, opens with gentle pressure on front face. Key turns 90° to 'block' button.

Insert from front into special piercing, secure with brackets provided at rear. Suits panels up to 2mm (special brackets for thicker panels).

'FS' keys only, non-locking model available.
