HOOKED BUDGET LATCHES

These models have a shaped 'hooked' bolt which engages with a pin to hold two panels together laterally. The shape of the hook and string spring provide very positive engagement.

'Handed' for 90° operation, LH/RH as shown, with deadbolt held positively in both 'open' and 'shut' positions by fitted spring. Note that tip of bolt will project from case when bolt is withdrawn.

Plant-on fixing through 9mm holes. Note that top and bottom plates are mechanically interleaved for maximum strength.

Normal finish is yellow zinc plated.
