## DIECAST GRAB-RAIL 250mm

This model was designed with clean, modern lines in reaction to traditional 'commode' style diecast grab handles with thin sections and curved shapes. It is ideal for use as an entry-assist on rear and side doors of trucks and vans, for compressor and engine covers, and on containerised gen-sets.

Low profile and wide section for good grip, with no sharp corners or edges. Fully plant-on, with semi-concealed fixing holes.

Black powder-coated or hand-polished and chromium plated. Special colours on request, volume permitting.

## CONCEALED-FIX DIECAST GRAB HANDLE

An attractive handle with 'streamlined' design to avoid sharp corners, with fixing from underneath into two tapped holes. Available in hand polished chromium-plated finish, or black powder-coated.
